ABOUT ME

Full-stack .NET Developer with 2.5 years of experience building scalable web applications using ASP.NET Core, Angular, and SQL. Skilled in RESTful API design, Redis caching, Azure deployments, and integrating third-party services like Stripe and Razorpay in test mode. Passionate about clean architecture, real-time systems, and DevOps automation.

EDUCATION

CHADALAWADA RAMANAMMA ENGINEERING COLLEGE

2019-2022

Bachelor of Technology in Electrical and Electronics Engineering - CGPA 8.45

SKILLS

- **Backend Development:** ASP.NET Core (MVC, Web API, Minimal APIs), C#
- **Frontend:** Angular, JavaScript, HTML, CSS
- **Databases:** SQL Server, PostgreSQL, SSIS, Entity Framework Core
- **Cloud & DevOps:** Azure App Services (deployment, blob storage, env config), Docker, GitHub
- **Messaging & Caching:** RabbitMQ (event-driven login alerts), Redis
- **Payments:** Stripe & Razorpay Integration (Sandbox/Test Mode)
- **Tools & Practices:** Postman, LINQ, Visual Studio, VS Code, RESTful APIs

WORK EXPERIENCE

2023-NOW

Software Engineer - Tech Mahindra Ltd

- Built 5 Angular/.NET modules for Nestle's trade promotion platform, reducing manual workflows by 40% and saving 20 hours/month.
- Increased codebase efficiency by 30% by optimizing .NET Core and Angular cooperation.
- Collaborated in Agile sprints to deliver features 20% faster than estimated timelines
- Optimized API response time by 25% by implementing Redis caching for session management, collaborating with senior engineers
- Enhanced transaction processing speed by 40% by restructuring Stripe payment integration.
- Developed ECommerce App featuring Redis-based cart management and dynamic quantity tracking
- Contributed to the development of 50 RESTful APIs in a high-volume environment.
- Implemented new ETL processes, resulting in a 30% increase in data processing speed.

CERTIFICATIONS

- AZ-900
Azure-Fundamentals

KEY ACHIEVEMENTS

Successfully developed and managed diverse web applications leveraging a variety of technologies

PROJECTS

NESTLE USA (NUSA) – WEBAPPS 2023-2025

Nestle USA manages a suite of integrated web applications built on Microsoft .NET and SQL Server platforms, supporting core business functions in Marketing & Sales and Supply Chain

- Led the implementation of Redis caching for Nestle's platform, reducing API latency by 25%
- Developed and maintained ASP.NET MVC and Angular-based web applications for business workflows
- Implemented Redis for session caching and real time data synchronization
- Used SSIS and legacy DTS packages for ETL processes to load, transform, and sync data
- Integrated Docker containers for streamlining development processes
- Built secure Restful APIs with JWT token authentication

BASF DIGITAL – LU APPLICATIONS 2025-NOW

.NET Developer & Data Migration Contributor

- Developed and enhanced ASP.NET Core MVC web apps for internal tools.
- Mapped critical report fields in SSRS and assisted in backend validation for accurate reporting.
- Improved data load efficiency by 30% through optimized ETL workflows in SSMS.
- Created control flows and job schedules in SSMS for daily ETL automation.
- Assisted in backend integration of these reports with modern APIs to support real-time data visualizations in Angular dashboards.
- Built SSIS packages to migrate historical customer and sales data from legacy systems into the new database schema.
- Created SSRS reports for business insights such as monthly product usage, employee performance, and financial summaries.

INDEPENDENT PROJECTS

E-COMMERCE PLATFORM

Built a full-stack app with Stripe/Razorpay payments, Redis-based cart & pagination caching, admin dashboards, inventory logs, and multi-stage approval workflows.

LIVE STOCKS TRADING

Developed real-time stock platform using Finnhub WebSocket, Digital Wallet with Stripe/Razorpay sandbox, JWT refresh with IP whitelisting, threshold alerts, and analytics dashboards.

SERVICENOW-LIKE TASK MANAGER

Created OAuth-secured task management tool with role-based JWT access, rate limiting, and dynamic status workflows (To Do/In Progress/Done).

REAL-TIME DATING APP

Built a SignalR-based chat system with typing indicators, read receipts, and JWT-based role access for admin/moderator/user functionalities.
